

DISC SCREEN

▸ The Sutco disc screen provides another technology for presorting cardboard (cartons) and paper. The use of the disc screen allows sorting processes by up to less than 60% of personnel - an economic aspect which pays. Another great advantage is the fact that large pieces of material are eliminated and the personnel is thus relieved. Also, the Sutco disc screen disentangles the remaining material and thus leads to an increase in the sorting quality.

Fine

Coarse screen

TECHNICAL DATA

Frame	Section steel construction of welded design
Frame	Axles with slip-on discs / spacers Drive supported by induction-hardened chain wheels
Discs	Triangular disc for disc screen fine plastic Elliptical disc screen for coarse plastic Hexagonal plate for industrial waste and wood from Hardox 500
Material to be conveyed	Cardboard, paper (industrial waste and wood)
Screen width and length	Design according to the required throughput
Motor power	7.5 kW for the coarse disc screen per cascade, 5.5 kW per cascade for the fine disc screen per cascade
